Subject: Red Head G5+ Adhesive

Guru Kumar,

MaineDOT's Concrete and Bridge New Product Evaluation Committee has completed its review of the subject product.

This product meets the requirements of AASHTO M235 (ASTM C 881) Type IV, Class B, C, Grade 3 and will be added to our Qualified Products List (QPL) as an Epoxy and Resin Based Adhesive Bonding System (ERB).

Please note that once this is placed on the Qualified Products List it is not to be considered "Approved for Use" but rather, "Prequalified for Use" meaning that it has undergone preliminary review for compliance with MaineDOT and AASHTO specifications. Final approval rests with the Designer, Project Manager, and Resident to determine if a product best suits the need of a particular project.

A friendly reminder: all products added to our QPL require re-certification five years from the initial date of prequalification and every five years thereafter to remain on the QPL.

Thank you for your interest in doing business with the Maine Department of Transportation.

Sincerely,

Dawn Bickford
